*"The Earth Laughs in Flowers"*

December 2011

Wholesale Greenhouses and Independent Garden Centers have witnessed tremendous changes as well as competitive pressures over the past 10 years. The days of just simply having a great looking plant are history. Consumers today are more demanding of plant quality, product knowledge and informative packaging. Wenke and Sunbelt Greenhouses have invested time and energy into developing products that answer your customer's wants and needs. From improved tagging to uniform pot configuration and appealing POP, we have strived to make the consumer purchase a seamless transaction at your store.

With the advent of the internet, new social media opportunities are available to locally owned Independent Garden Centers that enable them to create a more personal and relevant relationship with consumers on a level that the national chains can never achieve. Because IGC's are closely connected to their local community and the internet affords a cost-effective way to communicate to a focused audience, IGC's can quickly promote new products and services directly to their customers. Wenke and Sunbelt are working to help you achieve this next level of marketing. To that end we offer our customers "You-tube" style videos that can train your staff as well as promote new products to your customers. These videos can be distributed to your customers in a number of ways, such as:

- Posting directly on your website or Facebook page
- Distributing from your email list
- Display on the retail sales floor as an endless loop video

In addition to these videos, we are continuing to enhance the application of QR codes on our tags so consumers can learn more about the products on display. We will also be introducing "Eye catcher tags" which are designed to make the shopping experience for plants more entertaining.

In the 80's and 90's, simply displaying a bunch of colorful plants lead to great sales and dramatic profits. Those days, like the big V-8 from Motown, are no more. Our objective is to create a broad selection of products and services that will enable IGC's and Landscapers to increase their relevance in this ever-changing world. Following is our 2012 list of products grouped by departments along with an overview of our cart configuration options. Items that are new for this season are marked as such.

Best of luck this spring season. If you have any questions, please do not hesitate to call and if you are ever up in the Kalamazoo area, please stop on by; we would love to give you a tour of our facilities.

Sincerely,

Andy Ambrosio, Dan Hutton, and Rex Huffaker

## CART CONFIGURATIONS

Our rolling cart distribution system is designed to expedite the delivery process, maintain product freshness and quality, while minimizing un-load times. We have carts configured for 12-04's (110 flats), 6-06's (132 flats), potted plants (72 flats), and baskets (90 units). To insure the accuracy of your order and minimize shipping damage, we ship item groups in full shelf increments. However, multiple groups can be combined to make a full cart. By ordering in full shelf increments, we can build almost any format of cart. The following charts are designed to provide guidance on the options available.

	<u>110 flats of 12-04's</u>	<u>132 flats of 6-06's</u>
<i>shelf #</i>		
1 (top)	10 flats of 12-04	12 flats of 6-06

In the spring, your time is limited and our availability document is designed to quickly and accurately represent how many of an item is available and the status. This document will also indicate how many of an item loads to a shelf and to a cart. If you are completing the document within Excel, there is an active sub-total section on the bottom which will calculate how many units, shelves and carts of each category you have ordered.

We review each order prior to order entry and utilize these full shelves as the building blocks to create a freight efficient cart that also protects the quality of the plants. Simply create orders in full-shelf increments and we will combine them into a multi-cart order.

Thanks for the opportunity to supply great looking plants and here's to an early and long spring!
